Kindly add the following claims:

- 23. A polyurethane solution containing alkoxysilane structural units, wherein the polyurethane is the reaction product, in organic solution, of
- a) at least one at least difunctional polyol having a molecular weight of 500 to 16,000,
- b) at least one at least difunctional polyisocyanate having a molecular weight of 140 to 1,500,
- c) at least one low molecular weight at least difunctional alcohol and/or amine having a molecular weight of 32 to 500,
- d) at least one compound containing at least one alkoxysilane group and an isocyanate-reactive group and
- e) optionally a monofunctional compound containing an amino, alcohol or oxime group,

wherein the equivalents of component d) are at least 50% of the total equivalents of components d) and e).

- 24. The polyurethane solution of Claim 23 wherein the polyurethane is reaction product, in organic solution, of
